

List of Figures

<u>Figure #</u>	<u>Caption</u>	<u>Page</u>
2.1	East-Southeast View of Monitoring Site: Note “S” curve	3
2.2	Southeast View of Monitoring Station	4
2.3	North View of Monitoring Station	4
2.4	TEOM Control Unit	8
2.5	Size Selective Inlets	8
2.6	Carbon Monoxide Analyzer: CO Monitor TEI 48C	11
3.1	Monitoring Station Map Detail	21
3.2	Wind Vector and Resultant Concentration	23
3.3	Sensitivity of the Monitoring Station to the Borman Expressway	25
3.4	Average Flux vs. Origin Direction Jan 1, 2001 to November 30, 2001	26
3.5	Borman Exposure Flux Deviation from mean -90 to 110 degrees (270 to 110)	27
3.6	2001 Borman Monitoring Station Wind Rose	28
3.7	Seasonal Variations in CO and PM _{2.5} Concentration	30
3.8	Roads and General Background Surrounding the Borman Expressway Monitoring Station.	32
3.9	Population Density surrounding the Monitoring Site on the Borman Expressway	33

List of Figures

<u>Figure #</u>	<u>Caption</u>	<u>Page</u>
3.10	Aerial Photograph Directly over the Monitoring Site on the Borman Expressway	34
3.11	Flux Emanating from 10 to 40 and 150 to 180 degree arcs.	35
3.12	Flux of Borman Origin and Relative Traffic Flow	36
3.13	Average Urban Mixing Height	37
3.14	Average Atmospheric Stability	38
3.15	CO Sources and Monitoring Station	40
3.16	PM _{2.5} Sources and Monitoring Station	40
3.17	ISCST3 Predicted Average Concentrations from Permitted Point Source Origin	42
3.18	Predicted PM _{2.5} Concentration Due to Permitted Point Sources at Monitoring site by Borman Intersecting Wind Direction	44
3.19	Average Measured Concentration of PM _{2.5} and CO By Wind Direction Midnight to Midnight	45
3.20	Average Measured Concentration of PM _{2.5} and CO By Wind Direction Midnight to 5 am	46
3.21	Predicted CO Concentration of Permitted Stationary Origin	47
4.1	Emission factor for Borman Fleet 75F	51
4.2	Estimated Traffic Flow and Speed Vs. Density	52
4.3	Estimated Traffic Flow, Speed, and Emissions vs. Density	53

List of Figures

<u>Figure #</u>	<u>Caption</u>	<u>Page</u>
4.4	Combined Caline4 and ISCST3 Modeling Results and Measured Results	56
4.5	CO and PM _{2.5} Scatter Plot: Predicted vs. Measured Results	57
4.6	Borman Exposure: Flux and Flow vs. Occupancy	59
4.7	Borman Exposure: Flux and Occupancy vs. Flow	60
4.8	Theoretical PM _{2.5} Pollution Profile along Roadway Segment	65
4.9	Theoretical CO Pollution Profile along Roadway Segment	66
4.10	Theoretical PM _{2.5} Upstream Monitoring Station Record	67
4.11	Theoretical CO Upstream Monitoring Station Record	68
4.12	Theoretical PM _{2.5} Downstream Monitoring Station Record	68
4.13	Theoretical CO Downstream Monitoring Station Record	69
4.14	April 4, 2001 Accident Response: Flux	71
4.15	April 4, 2001 Accident Response: Concentration	73
4.16	February 10, 2000 Accident Effect	74
4.17	August 24, 2001 Congestion Event: Flux	75
4.18	August 24, 2001 Congestion Event: Concentration	76
4.19	July 11, 2001 Accident / Congestion Event	78
4.20	July 8, 2001 Acceleration / Deceleration Event	79
4.21	August 23, 2001 Accident and Recovery with Congestion Downstream PM _{2.5} Flux	81

List of Figures

<u>Figure #</u>	<u>Caption</u>	<u>Page</u>
4.22	August 23, 2001 Accident and Recovery with Congestion Downstream CO Flux	83
4.23	August 23, 2001 Accident and Recovery with Congestion Downstream PM _{2.5} Concentration	84
4.24	August 23, 2001 Accident and Recovery with Congestion Downstream CO Concentration	85
4.25	June 8, 2001 Extended Congestion Effects	86
